DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

Regarding claim 4, the cited prior arts, either alone or in combination, fail to teach control circuitry selectively switching the transmitter and receiver circuitry between a stand-by mode where only the receiver circuitry is operational to receive and demodulate the wireless reception signal from the base unit into audio signals and a communication mode where both the receiver circuitry and the transmitter circuitry are operational to receive and demodulate the wireless reception signal into audio signals and modulate and transmit audio signals as the wireless transmission signal, respectively, the control circuitry including a tone detector configured to monitor the wireless reception signal for a first activation frequency tone received from the transmitting base unit for remotely switching the control circuitry from the stand-by mode to the communication mode, the tone detector responsive to detecting the first activation frequency tone causing the control circuitry to switch from the stand-by mode to the communication mode, in combination with all of other limitations in the claim.

Claims 5-10 depend on claim 4. Thus, they are allowable.

Claims 1-3, 11-16 were previously allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
